**INCREASED SKUNK ACTIVITY**

There has been an increase in reports of skunk activity within Town limits. Skunks are often attracted to residential areas by the availability of food, water and shelter. They can do and eat everything—fruits, nuts, bird eggs, bugs, larvae, human wastes and garbage, small rodents, dog or cat food, etc. Skunks can be encouraged to leave by reducing or eliminating these attractants. Residents are encouraged to remove unused pet food and water bowls at night and ensure that garbage is stored in the town brown bins with lid closed.

**WATER MAIN LINE FLUSHING**

**Sept 14-18, 2020**      **Sept 21 - 25, 2020**  
**8:00am to 4:00pm**      **8:00am to 4:00pm**

Water main flushing may result in discoloration of water due to iron sediment.

Clothes washing should not be done during flushing periods as the water may cause discoloration of clothes.

If you notice significant discoloration, run your cold water tap for a few minutes to clear the line prior to running your hot water tap.
